Vol XII, ISSUE 05, DECEMBER, 2023

## Editorial

The wintry month of December is the last month of the year which contains the clarity, simplicity and silence you need for the best fresh start for a New Year. The beginning of this month is marked by World's AIDS day. Indian Navy Day and Vijay Diwas is also celebrated in this month to honour brave hearts of our defence sector. Christmas an annual festival commemorating the birth of Jesus Christ, is observed in December with an atmosphere of carols and glee. This year comes to an end and everyone is set to welcome the New Year.

As we are stepping in the year 2024, we are also entering into the 30th establishment year of our Institute, which was established by Late Shri Gurcharan Singh Ji as SBSPGI and now transformed into SBS University.

The Publication and Creative Writing Society is happy to note that many of the teachers and the students have evinced interest in the SBS Times by contributing creatively and interesting literary and arts items. This issue is a treasure of student's imagination and creativity, stories, beautiful pictures, and topics related to diversity of knowledge. The items not only mirror the creative talents of the contributors but also their analytical thinking. Being an editor of issue for this month's SBS Times, I hope that this issue will be received by one and all.

Happy Reading  
Editorial Team

## STUDENT COLUMN

### Life After Death

Life after death is a concept that humanity has been trying to understand for millennia. It is an area where Science, Religion and Philosophy merged with conflict yet powerful view and evidence that has formed and changed views in different sections of societies. For religious believers, the evidence is based upon God(s) and their solid faith in holy text yet all people including religious believers are influences by the views put forward by Science, experience, philosophy and individual upbringings. For evidence to be compelling it must be reliable. “Reliable Evidence” means different things to different people, it is defined as 'information that are trusted to be accurate' over the time, belief in an afterlife may change depending reliable evidence a person experiences. For these will near death experiences, their own experiences could be enough to believe that there is an afterlife/ most atheist do not believe in an afterlife or that human have any spiritual side so, plenty of scientific research or possibly a religious research would be needed as reliable evidence for an afterlife.

“For certain is death for the born and certain is birth for the dead; therefore, over the inevitable thou shouldst not grieve”. This quote from Bhagwat Gita sums up the Hindu prospective on Life after death. The tragedy of life is not death but what is let die inside of us while we alive...
