

Sardar Bhagwan Singh University Hosts Workshop on Neurodevelopmental Techniques for Adult Hemiplegics

Sardar Bhagwan Singh University held a two-day workshop focused on "Neurodevelopmental Techniques in Adult Hemiplegics." The event aimed to enhance understanding of interventions that improve functional mobility and quality of life for individuals affected by conditions such as stroke and traumatic brain injury.

The workshop welcomed over 100 Physiotherapy students from undergraduate and postgraduate programs. Prof. Dr. Reena Kumari, head of the Physiotherapy department, opened the event by addressing the attendees and introducing the keynote speaker, Dr. Prabhat Ranjan, a prominent neuro physiotherapist from AIIMS New Delhi. Dr. Ranjan, a certified practitioner of Neurodevelopmental Treatment (NDT) and Bobath techniques, shared his expertise on treating hemiplegic patients and highlighted the critical role of physiotherapy in rehabilitation.

The workshop was further distinguished by the presence of Dr. Deepak Sahni (Registrar), Prof. Maneesh Arora (Dean of Student Welfare), and other faculty members, showcasing SBSU's commitment to academic excellence.

The event was coordinated by Dr. Mohit Bhatt and Priya Kamboj, who concluded the workshop with a vote of thanks, expressing gratitude to the university management for supporting this valuable educational opportunity.
